

Leica DX Office Vision

Utility post processing software

DX Office Vision is a utility post processing software for mapping Ground Penetrating Radar (GPR) data from the field into a CAD drawing in an easy and professional way with minimal training. DX Office Vision makes post processing easy to master for less experienced users, delivering value and precision with minimum steps.

KEY BENEFITS

- Create CAD drawings of the detected utilities in an uncomplicated way
- Reduce processing time with no intermediate converting, third party software or patch required
- Merge your DX Office Vision data with other Leica Geosystems detection products
- View collected data of the detected utilities in a simple way
 - compare data files side by side or from top to bottom to locate consistent features
- Obtain CAD drawings in 3D with object attributes in different layers – filter, select, identify and make annotations of consistent targets and anomalies

Leica DX Office Vision - Utility post processing software

From field to CAD drawing

DX Office Vision delivers professional CAD drawings in a very easy and professional way. DX Office Vision brings ease-of-use, efficiency and speed to post processing software market.

- Integrate data from different Leica Geosystems utility detection solutions in one platform
- Visualise and verify online maps
- Easy and fast export to CAD file

Utility post processing integration

Leica DX Office Vision integrates all the Leica Geosystems detection portfolio and more.

KEY FUNCTIONS

- Automatic data import and filtering
- Real-world depth calibration
- 3D CAD export
- Target addition & connectivity
- Depth filtering
- Background map import

Take over data processing into CAD drawings with confidence and simplicity

For utility surveyors looking to map digitally the detected underground utilities, DX Office Vision is the post processing software with the fastest conversion speed and most intuitive interface to convert GPR data into CAD drawings for every user.

DX Office Vision was developed by utility mapping contractors who are every day on the field, and understand the need of delivering 3D CAD drawings in an efficient way.
