Highest efficiency and accuracy For all machine control applications

The Leica iCA202 GNSS machine receiver increases the overall performance of your machine control system and ensures maximum uptime, enabling you to master different applications faster at uncompromising quality. No matter which machine type you operate, the Leica iCA202 is one of the essential components of the Leica Geosystems high-end machine control solutions designed to bring your productivity to the next level.

The Leica iCON iXE3 machine control solution provides realtime cut/fill indications, allowing you to rapidly excavate to the reference design.

The Leica iCON iGD3 solution for dozers ensures that you move the amount of dirt that needs to be moved; nothing less, nothing more and with the first pass.

The Leica iCON grade can dramatically increase machine efficiency, productivity and optimise material usage on any earthmoving and fine-grading project.

The Leica iCON alpine snow management solution makes slope preparation according to a 3D reference model a walk in the snow-park!

And much more...

intelligent CONstruction

Leica Geosystems intelligent CONstruction.

Whether you construct buildings, roads, bridges or tunnels, you benefit from intelligent CONstruction. Leica iCON is more than a new product line or software package; it's a complete solution that enables you to enhance your performance and increase your profitability through perfecting your construction workflow.

Understanding construction demands outstanding solutions:

- Custom-built
- Complete
- Straightforward
- High performance

Leica Geosystems - when it has to be right

Revolutionising the world of measurement and survey for more than 200 years, Leica Geosystems, part of Hexagon, creates complete solutions for professionals across the planet. Known for premium products and innovative solution development, professionals in a diverse mix of industries, such as aerospace and defence, safety and security, construction, and manufacturing, trust Leica Geosystems for all their geospatial needs. With precise and accurate instruments, sophisticated software, and trusted services, Leica Geosystems delivers value every day to those shaping the future of our world.

Hexagon is a global leader in digital reality solutions, combining sensor, software, and autonomous technologies. We are putting data to work to boost efficiency, productivity, quality, and safety across industrial, manufacturing, infrastructure, public sector, and mobility applications.

Our technologies are shaping production and people-related ecosystems to become increasingly connected and autonomous – ensuring a scalable, sustainable future.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 21,000 employees in 50 countries and net sales of approximately 3.8bn EUR. Learn more at hexagon.com and follow us @HexagonAB.

Leica ConX Flyer

Leica iCON aps 200 SeriesDelivering performance

Boost machine productivity with the high performing Leica iCA202 GNSS machine receiver.

The Leica iCA202 is the ultimate GNSS machine receiver, providing high productivity for your machine control operations. In combination with the CGA100 GNSS antenna, earthmoving, road construction and other heavy construction machines can benefit from machine automation possibilities built on the features of this powerful GNSS machine receiver.

- Continuous GNSS signal availability, even when the primary antenna is blocked
- Customers can easily change between 400 MHz and 900 MHz with the integrated dual frequency radio – no additional hardware required (for USA/CAN only)
- Powerful CPU
- HxGN SmartNet PPP bridges RTK connection gaps up to 10 minutes, increasing machine uptime
- Leica ConX provides remote access to the machine computer for fast, reliable data transfer and support

GNSS PERFORMANCE						
GNSS technology	Leica patented SmartTrack+ technology: • Advanced measurement engine(s) • Jamming resistant measurements High precision pulse aperture multipath correlator for pseudorange measurements • Excellent low elevation tracking • Minimum acquisition time; Advanced SmartHeading calculation					
Number of channels	555 x 2					
Maximum simultaneous tracked satellites	Up to 60 Satellites simultaneously on two frequencies per antenna					
Position update rate	Up to 100 Hz					
Satellite signals tracking	• GPS: L1 C/A, L2P, L2C, L5 • GLONASS: L1 C/A, L2P, L2C, L3 • Galileo: E1, E5a, E5b, Alt-BOC, E6 • BeiDou B1I, B1C B2I, B2a, B3I • QZSS: L1, L2C, L5, L6¹¹ • SBAS: L1, L5¹¹ (WAAS, EGNOS, MSAS, GAGAN) • L-Band: Terrastar					
GNSS measurements	Fully independent code and phase measurements of all frequencies: • GPS: carrier phase full wave length (C/A, P, C Code) • GLONASS: carrier phase full wave length, Code (C/A, P narrow Code) • Galileo: carrier phase full wave length, Code					
Reacquisition time	< 1 sec²)					
MEASUREMENT PERFORMANCE & A	CCURACY					
Accuracy (rms) with real-time (RTK	() ²⁾					
Standard of compliance	Compliance with ISO17123-8					
Single baseline (< 30km)	Horizontal: 8 mm + 1 ppm (rms), Vertical: 15 mm + 1 ppm (rms)					
RTK bridging	Up to 10 min bridging of RTK outages. Horizontal: 2.5cm, Veritical: 5cm					
PPP	Initial convergence to full accuracy, typically 10 min, Re-convergence < 1 min Horizontal: 2.5cm, Veritical: 5cm					
Heading accuracy (rms) ²⁾						
Dynamic RTK positioning accuracy, after initialisation	Antenna separation 1 m: $<$ 0.18°, Antenna separation 2 m: $<$ 0.09°, Antenna separation 5m: $<$ 0.05°					
On-the-fly (OTF) initialisation						
RTK technology	Leica SmartCheck+ technology					
Reliability of OTF initialisation	Better than 99,99% ²⁾					
Time for initalisation	Typically 4 sec ²⁾					
Network RTK						
Network technology	Leica SmartRTK technology					
Supported RTK network solutions	iMAX, VRS, FKP					
Supported RTK network standards	MAC (Master Auxiliary Concept) approved by RTCM SC 104					
•••	MAC (Master Auxiliary Concept) approved by RTCM SC 104

INTERFACE						
User Interface	Web interface • Several submenus for additional details • Various configurations in submenus, e.g. radio channel • Set up Rover and coordinate system					
LED status indicator	3 x status information LEDs (Power, GNSS, Internet)					
COMMUNICATION						
Communication ports	$3 \times$ CAN Power/Data $1 \times$ USB Host, $1 \times$ serial, $2 \times$ TNC for external GNSS antenna, $1 \times$ TNC for external radio antenna, $2 \times$ TNC for external modem antenna, $2 \times$ M12 Ethernet $1 \times$ TNC for external Bluetooth antenna, $1 \times$ TNC for external Wi-Fi \otimes antenna					
Built In data links						
Radio modems	• Optional embedded radio • Dual frequency radio³) • SATEL TR489: 403 – 473 MHz; Pac-crest 4FSK, GMSK & FST, Trimble T & P, Satel 3AS, 8FSK & 16FSK modulation; 902 – 928 MHz (license free in North America)					
Radio modem antenna	External antenna connector (Type TNC)					
4G LTE / 3G HSPA / HSPA+ / WCDMA / UMTS / Cellular modem	• Built-in cellular modem as default • User exchangeable SIM card • 22-Band LTE: Band 1, 2, 3, 4, 5, 7, 8, 9, 12, 13, 18, 19, 20, 26, 28, 29, 30, 32, 41, 42, 43, 46, 48, 66 • 9-Band UMTS / HSPA / HSPA+ / WCDMA: Band 1, 2, 4, 5, 6, 8, 9, 19 • Up to 100 mbps downlink speed					
4G LTE / 3G HSPA / HSPA+ / WCDMA / TD-SCDMA / UMTS / Cellular modem antenna	2x external antenna connector (Type TNC)					
Wi-Fi® module	802.11 a/b/g/ac Wi-Fi®					
Bluetooth®	Bluetooth v3.0 on Qualcomm CSR8510 (not running in LE mode)					
External data links						
Radio modems	Support of any suitable serial RS232 UHF radios					
Communication protocols						
Real-time data formats for data reception	Leica 4G, Leica, Leica Lite, CMR, CMR+, RTCM v2.3, RTCM 3.1, RTCM 3.2 MSM x					
GNSS ANTENNA						
Туре	CGA100					
GNSS technology	SmartTrack+					
Satellite signals tracking	• GPS: L1, L2, L2C, L5 • GLONASS: L1, L2, L3 • Galileo: E1, E5a, E5b, Alt-BOC, E6 • BeiDou B1, B2, B3					
Ground plane	Built-in ground plane					
Dimensions (diameter × height)	165 mm × 60 mm (6.50 × 2.36 in)					
Weight	0.44 kg (0.97 lbs)					
Gain	29 db					
Temperature operating	-40°C to +85°C (-40°F to +185°F)					
Temperature storage	-55 °C to +85 °C (-67 °F to +185 °F)					
Humidity	IEC60068-2-30 98%r.H./25°C, 93%r.H./55°C					
Protection against water, sand	IP68, IP69K					
Drops & topple over	Withstands 1.5 m drop onto hard surfaces and survives topple over from a 2 m pole onto hard surfaces					
Vibration	IEC 60068-2-6: 5-500 Hz, 15 g, ±15 mm MIL-STD-810G: Fig.514.6E-1 Category 24 (20-2000 Hz, 7.7 grms) withstands vibrations during operation on large civil construction machines.					
Shock	IEC 60068-2-27 (special): 60 g, 6 ms IEC 60068-2-27: 100 g, 2 ms withstands vibrations during operation on large civil construction machines.					

 $^{^{\}mbox{\tiny 1)}}$ QZSS L6 and SBAS L5 will be provided through future firmware upgrade.

GLONASS can increase performance and accuracy by up to 30% relative to GPS only. A full Galileo and GPS L5 constellation will further increase measurement performance and accuracy.

Scan to find out more about the Leica Geosystems machine control solutions!

Measurement precision and accuracy in position, reacquisition and initialisation time, height and heading are dependent upon various factors including number of satellites, tracked signals, obstructions, geometry, observation time, ephemeris accuracy, atmospheric conditions, multipath etc. Figures quoted assume normal to favourable conditions. GPS and
