

Leica Map360 Forensic Mapping and Analysis Software

Software Packages Comparison Chart

MAP360 Features	Sketch	Standard	Pro
2D Drafting tools, dimensioning, top down view only	●	●	●
Templates for courtroom-ready exhibits	●	●	●
Evidence Log, evidence markers and reporting	●	●	●
Traffic and forensic symbols, advanced linetypes	●	●	●
SketchUp model import	●	●	●
Hexagon Imagery (HxIP) support / Bing Maps / Georeferenced images	●	●	●
Import points (ASCII), or create points from baseline and triangle offset	●	●	●
Import REG360 ortho slice	●	●	●
Accident reconstruction formulas		●	●
Manual trajectory cones		●	●
Animation – animation of objects		●	●
Direct import Leica Viva, Leica Captivate or Evidence Recorder. Geoid, map projection support, total station measurement log, geodetic coordinate support.		●	●
3D drafting tools and ability to visualize scene in a 3D perspective or rotated view		●	●
Witness viewpoint wizard		●	●
QA report generation from Leica twin target pole data		●	●
Blood pattern analysis (support for manual points, no point cloud alignment)		●	●
Blood pattern analysis (with point cloud alignment support)			●
Point cloud display controls – visibility, color modes, basic limit box			●
Single file import of LAS / e57			●
Cyclone IMP / Jet Stream / LGS support			●
TruSpace panoramic viewer / COE import & export			●
Limit boxes, slices, cutting planes, reference planes, smart picks			●
Bullet trajectory modeled from point cloud data			●
Measure distance between point cloud planes / Dynamic labels			●
