What's New

This is a minor release including bug fixes for license stability.

Bug Fixes

Installation and Licensing Bugs

- Corrected a bug which caused JetStream Enterprise to consume multiple seats of a license for a single deployment.

Publishing Bugs

- Corrected a bug which prevented JSV files from being published from password-protected projects. JSV files cannot be password-protected. For password-protected files, please use the LGS format.

Leica JetStream Enterprise Compatibility and Upgrades

Upgrading to Leica JetStream Enterprise 1.6.2 with network storage

When upgrading to the latest version of JetStream Enterprise when primary storage is a network location, it might happen that the service does not start correctly due to service login credentials being reset with the update. The user should enter the service login credentials and reboot the machine before attempting to restart the service.

Compatibility

JetStream Enterprise requires corresponding releases of Cyclone, Cyclone REGISTER 360, CloudWorx, and JetStream Viewer for all features to function correctly:

	Publish background panoramic image data to JetStream Enterprise	Publish HDR Pano images	Publish GeoTags, assets, layers, SiteMaps	View GeoTags, assets, layers SiteMaps	View Pano Imagery	View JSV files published from JetStream Enterprise	Store Snapshots created in JetStream Viewer	Publish LGS	Import/Open LGS
<i>Cyclone</i>	9.1.4 or higher	9.2.1 or higher	9.3 or higher	9.3 or higher	-	-	-	9.2 or higher	9.2 or higher
<i>Cyclone REGISTER 360</i>	1.4 or higher	1.4.1 or higher	1.5 or higher	-	-	-	-	1.5 or higher	
<i>Cyclone REGISTER 360 (BLK Edition)</i>	1.6.2 or higher	1.6.2 or higher	1.6.2 or higher					1.6.2 or higher	
<i>JetStream Enterprise</i>	-	-	-	1.5 or higher	-	-	1.6 or higher	1.5 or higher	1.5 or higher
<i>JetStream Viewer</i>	-	-	-	1.5 or higher	1.2 or higher	1.3 or higher	1.6 or higher*		1.5 or higher
<i>CloudWorx AutoCAD</i>	-	-	-	6.4 or higher	6.1 or higher	-	-		6.4 and higher
<i>CloudWorx MicroStation</i>	-	-	-	5.1.4 or higher	5.1.4 or higher	-	-		5.2 and higher
<i>CloudWorx PDMS</i>	-	-	-	2.2 and higher	2.0.1 or higher	-	-		2.2 and higher
<i>CloudWorx Revit</i>	-	-	-	2.2 or higher	2.2 or higher	-	-		2.2 and higher

CloudWorx Navisworks	-	-	-	1.1 or higher	1.0.2 or higher	-	-		1.1 and higher
CloudWorx BricsCAD	-	-	-	1.0 or higher	1.0 or higher	-	-		1.0 and higher
CloudWorx for SOLIDWORKS									1.0 and higher

*JetStream Viewer can "publish" LGS files only when data was opened in that format and Markups have been added

Known Issues

Usage file reporting issue for EnterpriseElite Customers

When using the standalone CLM installer, some EnterpriseElite users may find that the usage file (year-month.db) normally located at *C:\Leica Geosystems\CLM\LogFiles* does not get produced.

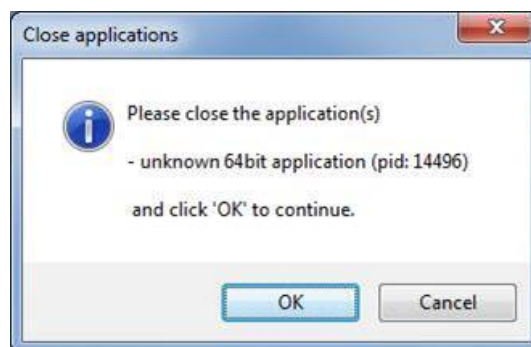

Please ensure your LGS.opt (located here: *C:\Program Files (x86)\Common Files\Leica Geosystems\License-Server\lgs.opt*) file looks like this:

```
DEBUGLOG +"C:\Leica Geosystems\CLM\LogFiles\lgs.log"
NOLOG IN
TIMEOUTALL 240
ENABLE_DB_HISTORY 1
PATH_DB_HISTORY C:\Leica Geosystems\CLM\LogFiles
```

ENABLE_DB_HISTORY should be set to **1** in this file. Please copy the file to a new location, edit it and re-save if the file says it's read-only.

Installing CLM while JetStream is running

During installation of CLM, users may encounter the following error message. This is commonly due to a service like JetStream running in the background.

To enable the successful installation of CLM, please follow these steps:

- Launch the task manager
- Select the Services tab
- Look up the process with the PID (Process ID) shown in the Close applications dialog
- In this case it is JetStream
- Terminate the process so that CLM can be installed
- After CLM is installed, click on the Services button in the Task Manager and restart the service

Password-protected LGS files

Passwords cannot be recovered or changed for either projects or files but may be removed and re-added for projects within JetStream Enterprise or re-published from Cyclone or Cyclone REGISTER 360.

Cyclone REGISTER does not accept LGS files published from JetStream Admin that are protected with a password that includes non-ASCII characters.

Licensing

All users with currently valid CCP, or with CCP valid as late as 1st April 2019, can run this new version with no new license required
