

Laser Glasses

The best choice for your requirements

When working outside, it might be difficult to see the laser line or dot. Special glasses guarantee an optimal visibility of the laser lines and dots in bright conditions and over longer distances. For outside applications with a laser, Leica Geosystems recommends one of its high quality laser glasses.

Leica GLB30 Laser Glasses

- For improved visibility of red laser dots or lines in bright rooms and outdoors up to 15m
- With a weight of 18g, it is the world's lightest laser visibility glasses
- 3 in 1: the first set of glasses in the world that comes with lenses for laser visibility, safety and sun protection
- All 3 lenses are scratch resistant
- The safety glasses and sun glasses are non-fogging
- A lacquer system features nanotechnology
- The soft plastic ensures maximum comfort and excellent non-slip properties
- Incl. micro fibre bag which can also be used for cleaning

Art. No. 780 117
