

# Leica CityMapper

## More information, smarter decisions

### Capture more

Leica CityMapper is the world's first hybrid airborne sensor specifically designed for urban mapping. One sensor provides oblique and multispectral nadir imagery as well as LiDAR data. Collect all you need to create any 2D or 3D geospatial data product essential for smart city applications. Discover the most efficient way to capture airborne data in urban areas.

### Process faster

Leica HxMap is the high-performance multisensor workflow featuring the industry's fastest data throughput. Process the data captured with the CityMapper in one simple, intuitive user interface and generate the SmartBase, a comprehensive geospatial base layer, at the push of a button. HxMap is modular, scalable and upgradable specific to your needs.

### Work smarter

By combining the CityMapper with HxMap, Leica RealCity offers the foundation to make smart decisions in rapidly changing urban environments. It is the fastest and most efficient way to create all geospatial information layers. The SmartBase consists of up-to-date and highly accurate 2D products and 3D models, all generated from simultaneously acquired data.

## CITYMAPPER POD

|                          |  |
|--------------------------|--|
| <b>Consists of</b>       | 1 x Leica RCD30 CH82 multispectral camera in nadir<br>4 x Leica RCD30 CH81m oblique camera, viewing angle 45°<br>1 x Leica Hyperion LiDAR unit |
| <b>IMU</b>               | SPAN CNU55-H, no export license required US ECCN 7A994   |
| <b>Height / diameter</b> | 747 mm / 408 mm  |
| <b>Weight</b>            | 54 kg complete   |

Designed for installation in Leica PAV100 and Leica PodLifter.

## CAMERA HEAD LEICA RCD30 CH82

|                                 |  |
|---------------------------------|--|
| <b>CCD size (80MP)</b>          | 10,320 x 7,752 pixels  |
| <b>Pixel size (80MP)</b>        | 5.2 µm   |
| <b>Dynamic range of CCD</b>     | 73 dB  |
| <b>Resolution A/D converter</b> | 14-bit   |
| <b>Data channel</b>             | 16-bit lossless compressed   |
| <b>Max. frame rate</b>          | 1.5 sec  |
| <b>Motion compensation</b>      | Mechanical, bi-directional   |
| <b>Spectral range</b>           | RGB and NIR (780-880 nm), co-registered  |
| <b>Viewing angle</b>            | Nadir  |
| <b>Weight (w/o lens)</b>        | 3.1 kg   |
| <b>Height / diameter</b>        | 168 mm / 128 mm  |
| <b>Optics</b>                   | Leica NAT-D 80 mm<br>35.9° FOV across track, 27.4° FOV along track                           |
| <b>Optics weight / height</b>   | 0.5 kg / 46 mm   |
| <b>Shutter</b>                  | Central shutter, user replaceable (>200,000 frames)  |
| <b>Aperture</b>                 | Automatically controlled aperture<br>2.8 / 4.0 / 5.6 / 8.0                                   |
| <b>Lens mount</b>               | Precise bayonet connection, automated electrical connection, stabilised connection mechanics |

## CAMERA HEAD LEICA RCD30 CH81M

|                                 |  |
|---------------------------------|--|
| <b>CCD size (80 MP)</b>         | 10,320 x 7,752 pixels  |
| <b>Pixel size (80 MP)</b>       | 5.2 µm   |
| <b>Dynamic range of CCD</b>     | 73 dB  |
| <b>Resolution A/D converter</b> | 14-bit   |
| <b>Data channel</b>             | 16-bit lossless compressed   |
| <b>Max. frame rate</b>          | 1.5 sec  |
| <b>Motion compensation</b>      | Mechanical, in flight direction  |
| <b>Spectral range</b>           | RGB  |
| <b>Viewing angle</b>            | 45°  |
| <b>Weight (w/o lens)</b>        | 2.1 kg   |
| <b>Height / diameter</b>        | 138 mm / 128 mm  |
| <b>Optics</b>                   | Leica SAT-D 150 mm<br>19.5° FOV across track, 14.8° along track                              |
| <b>Optics weight / height</b>   | 0.8 kg / 95 mm   |
| <b>Shutter</b>                  | Central shutter, user replaceable (>200,000 frames)  |
| <b>Aperture</b>                 | Automatically controlled aperture<br>4.0 / 5.6 / 8.0 / 11.0                                  |
| <b>Lens mount</b>               | Precise bayonet connection, automated electrical connection, stabilised connection mechanics |

## CAMERA & LIDAR CONTROLLER CC33

|                              |   |
|------------------------------|---|
| <b>CC33</b>                  | Controls all camera heads and LiDAR unit, includes deeply coupled GNSS/IMU solution |
| <b>Weight (without MM30)</b> | 6.1 kg  |
| <b>Dimensions L x W x H</b>  | 300 x 260 x 140 mm  |
| <b>Processor</b>             | 64-bit WIN7, 8GB RAM, 32 GB flash, USB 2.0, SATA                                    |
| <b>Mass memory</b>           | Leica MM30 solid state drive 2,400 GB<br>CC33 holds up to 2 MM30s                   |
| <b>Mass memory weight</b>    | 0.5 kg each, 2 required, removable and portable                                     |
| <b>Mass memory capacity</b>  | Joint volume 4.8 TB, > 4.5 h of data collection at max. rate                        |

## LIDAR UNIT

|   |  |
|---|--|
| <b>Laser wavelength</b>                       | 1,064 nm   |
| <b>Laser divergence</b>                       | 0.25 mrad (1/e <sup>2</sup> )  |
| <b>Pulse repetition frequency</b>             | Up to 700 kHz (height dependent)   |
| <b>Return pulses</b>                          | Programmable up to 15 returns, including intensity<br>Full waveform recording option at down-sampled rates |
| <b>Intensity digitisation</b>                 | 14 bits  |
| <b>Operation altitude <sup>1</sup></b>        | 300 - 2,500 m AGL at 700 KHz<br>>4,000 m AGL at lower pulse rates  |
| <b>Scanner pattern</b>                        | Oblique scanner  |
| <b>Scan speed</b>                             | Programmable up to 100 Hz (6,000 RPM),<br>200 scan lines per second  |
| <b>Field of view</b>                          | 40°  |
| <b>Swath width</b>                            | 70% of flight altitude   |
| <b>Point density <sup>2</sup></b>             | Typically 8 points per square metre at 1,000 m AGL<br>Typically 4 points per square metre at 2,000 m AGL   |
| <b>Min. vertical separation</b>               | 0.5 m  |
| <b>Vertical accuracy <sup>2, 3, 4</sup></b>   | < 5 cm 1 σ   |
| <b>Horizontal accuracy <sup>2, 3, 4</sup></b> | < 13 cm 1 σ  |
| <b>Dimensions L x W x H</b>                   | 252 x 190 x 485 mm   |
| <b>Weight</b>                                 | 12.5 kg  |

## PERIPHERALS

|                         |   |
|-------------------------|---|
| <b>Sensor mount</b>     | Leica PAV100 gyro-stabilised mount for high-performance data acquisition, 38 kg<br>L x H x W 673 x 532 x 168 mm |
| <b>Pod lifter</b>       | Leica PodLifter to lift up the entire CityMapper pod for takeoff and landing, 20 kg                             |
| <b>Operator display</b> | Leica OC60 12.1" screen with 1024 x 768 resolution, designed for installation with Interface Stand IS40, 5.0 kg |
| <b>Pilot display</b>    | Leica PD60 6.3" screen with 1024 x 768 resolution, designed for cockpit mounting, 1.0 kg                        |
| <b>IS40 stand</b>       | pedestal for OC60, 5.5 kg   |

## ENVIRONMENTAL

|                              |   |
|------------------------------|---|
| <b>Pressure</b>              | Non-pressurised cabin up to ICAO 15,000 ft        |
| <b>Humidity</b>              | 0% to 95% RH according ISO7137 (non-condensating) |
| <b>Operating temperature</b> | 0 °C to 35 °C                                     |
| <b>Storage temperature</b>   | -40 °C to 70 °C                                   |

## ELECTRICAL

|   |                          |
|---|--------------------------|
| <b>Max. power consumption of complete system</b>      | 950 W / 28 VDC           |
| <b>Max. peak power consumption of complete system</b> | 1,200 W (< 60s) / 28 VDC |
| <b>Fuse on aircraft power outlet</b>                  | 1 x 50A                  |

## SOFTWARE

|   |                   |
|---|-------------------|
| <b>Mission planning</b>                         | Leica MissionPro  |
| <b>Flight navigation &amp; sensor operation</b> | Leica FlightPro   |
| <b>Trajectory processing</b>                    | Inertial Explorer |
| <b>Point cloud/image processing</b>             | Leica HxMap       |

## STANDARDS

|  |
|--|
| RTCA DO-160G, EUROCAE-14G, USA FCC Part 15 |
|--|

<sup>1</sup> Maximum operating altitude is specified for 90% detection at ≥10% reflectivity (e.g. dry asphalt) and 100% laser output

<sup>2</sup> Accuracy and point density stated in the table is acquired @1,000 m AGL, 60 m/s aircraft speed

<sup>3</sup> The 1σ value represents the 68% confidence interval. Typically, the RMSE value is equal to 1 standard deviation

<sup>4</sup> Stated vertical and horizontal accuracies after calibration and registration using Leica HxMap workflow and with an assumed GNSS position error of 4 cm

Invisible laser radiation, avoid eye or skin exposure to direct or scattered radiation.  
Class 4 laser product in accordance with EN/IEC 60825-1:2014.
