

Leica Geosystems HDS Software Subscription offerings

Flexible

Scale up your business by purchasing subscriptions on an as-needed basis. All subscriptions are one-year in duration and will auto-renew until you cancel your plan. Mix-and-match your subscriptions with as many seats as you need per product and have confidence that you can produce the deliverables your clients need, when they need them.

Cost-effective

Low cost subscriptions allow you to concretely budget new software into your project plans. All subscriptions include Leica Geosystems' best-in-class Customer Care Package (CCP) which provides the user access to product support and upgrades for the duration of the subscription.

Simple

Subscriptions offer a simple way to bring the benefits of Leica Geosystems' end-to-end Cyclone ecosystem into your project workflows. With a subscription, you always have the latest version of the software and someone to turn to when you have questions. Download, license, and run subscriptions the same as your other Leica Geosystems High-Definition Surveying (HDS) software solutions. There is no additional learning curve for incorporating a new subscription software.
