

Leica GeoMoS Now! Survey Edition

Monitoring
Solutions

Campaign monitoring solution provides time-saving simplification

Have you ever had to measure the same set of points multiple times? For all surveyors and engineering companies, the Leica GeoMoS Now! Survey Edition offers a simple and straight forward solution for managing campaign measurements. While still in the field, surveyors can use GeoMoS Now! Survey Edition to create and distribute visual reports to any end user. All defined users have real-time access to all existing and previous surveying projects using

any web-based device. It's the fastest and most efficient solution on the market for all total station and digital level operators to collect, process and distribute monitoring information.

Instant information in just few clicks

The right solution for campaign monitoring tasks

GeoMoS Now! Survey Edition can be used in all situations where repetitive point measurements, fast visualisations and reporting results are needed. Regardless if you have one sensor or a complex monitoring installation, GeoMoS Now! Survey Edition is the right partner for campaign monitoring of any standard surveying projects – from streets or bridges to water level or land stability.

Leica GeoMoS Now! Survey Edition offers engineering companies and surveyors a fast and simplified solution to manage their repetitive control point measurements. Just a few simple steps is all it takes now to reduce errors, time and costs in one simplified workflow.
