

## Leica DSX – Licence to operate GPR equipment in Europe

### Licensing Notice

Although conformance to the Radio Equipment Directive (RED) 2014/53/EU, allows the placing of a GPR/WPR product on the market for sale, it does not give authority for its use. In order to use the equipment in the majority of EU member countries a licence is required. The licence is controlled and issued by the radio administration in each of the member countries.
