## What's New

### ***Improved loading and rendering of Cyclone point clouds***

CloudWorx 1.0.7 for Navisworks includes performance enhancements for working with Cyclone ModelSpace data. Loading and rendering speeds have been improved during view changes.

## Bug Fixes

- *Bug fixed which could sometimes result in a sparse display of points*
- *Bug fixed where clash checks could not be performed when using JetStream Enterprise 1.3*
- *Bug fixed where points could appear to have incorrect scale after saving project*
- *Fixed an issue that could have prevented TruSpaces from being opened when using JetStream Enterprise 1.3*
- *Fixed a case where a background process may not terminate properly after importing a ModelSpace View.*

## Leica CloudWorx 1.0.7 for Navisworks Compatibility and Upgrades

### ***Upgrading to Leica CloudWorx 1.0.7 for Navisworks from Leica CloudWorx 1.0.x for Navisworks***

You must have Administrator-level privileges on your workstation to correctly install Leica CloudWorx software.

If using IMP data, first run the current Cyclone installer if you do not have a version of Cyclone installed. Otherwise/Next run the CloudWorx 1.0.7 installer and follow the directions in the InstallShield Wizard to proceed with the installation. Please heed the warning message about compatibility of earlier version databases. We strongly recommend that when upgrading, please select the "Remove" option when it appears, rather than the "Repair" option.

### ***Compatibility with Leica CloudWorx 1.0.7 for Navisworks AND Earlier Versions***

Cyclone 7.2 databases are *NOT* backward compatible. Therefore, older databases must be updated before using Cyclone 7.2 and can no longer be used with earlier versions. If you need to work with your data in older versions of Cyclone or CloudWorx, you should make an archive copy of your database(s) prior to upgrading. Since it can take some time to update and optimize Cyclone databases, we recommend that you optimize your databases overnight, particularly when multiple databases are involved.

### ***Compatibility with Leica CloudWorx 1.0.7 for Navisworks AND Navisworks Versions***

CloudWorx 1.0.7 officially supports Autodesk Navisworks Simulate and Manage versions 2015-2018.

### ***Compatibility with Leica JetStream***

CloudWorx 1.0.7 for Navisworks is compatible with JetStream 1.3 and higher.

## Known Issues

### *Optimizing Older Databases with Windows 7 and Higher*

If users wish to use CloudWorx 1.0.7 for Navisworks to optimize IMP databases from Cyclone version 7.0 or higher, they must first disable User Access Control prior to optimizing, or the optimization will not succeed yet no meaningful error message will be produced.

## Licensing

All users with a valid license(s) for CloudWorx 1.0.x or later, currently valid CCP, or with CCP valid as late as May 25, 2015, can run this new version with no new license required.
