What's New

CloudWorx 5.1.3 for MicroStation supports CloudWorx Ultimate

CloudWorx Ultimate is a new license which supports the use of the following existing CloudWorx plugins:

- CloudWorx for AutoCAD Basic and Pro
- CloudWorx for MicroStation
- CloudWorx for PDMS
- CloudWorx for Revit
- CloudWorx for Navisworks
- MultiWorx for AutoCAD

New CLM 1.6

CloudWorx now includes and supports Leica Client License Manager (CLM) 1.6, which offers greater stability and a fix for EnterpriseElite customers.

Leica CloudWorx 5.1.3 for MicroStation Compatibility and Upgrades

Upgrading to Leica CloudWorx 5.1.3 for MicroStation from Leica CloudWorx 5.1

You must have Administrator-level privileges on your workstation to correctly install Leica CloudWorx software.

If using IMP data, first run the current Cyclone installer if you do not have a version of Cyclone installed. Otherwise/Next run the CloudWorx 5.1.3 InstallShield and follow the directions in the InstallShield Wizard to proceed with the installation. Please heed the warning message about compatibility of earlier version databases. We strongly recommend that when upgrading, please select the "Remove" option when it appears, rather than the "Repair" option.

All users with a valid license(s) for CloudWorx 5.1.x or later can run this latest version with no new license required. All users with a currently valid CCP or with CCP which was valid as late as April 18, 2016 can receive a new license to run this version.

Compatibility with Leica CloudWorx 5.1.3 for MicroStation AND Earlier Versions

Cyclone 7.2 databases are *NOT* backward compatible. Therefore, older databases must be updated before using Cyclone 7.2 and can no longer be used with earlier versions. If you need to work with your data in older versions of Cyclone or CloudWorx, you should make an archive copy of your database(s) prior to upgrading. Since it can take some time to update and optimise Cyclone databases, we recommend that you optimize your databases overnight, particularly when multiple databases are involved.

Compatibility with Leica CloudWorx 5.1.3 for MicroStation AND MicroStation Versions

CloudWorx 5.1.3 officially supports MicroStation versions J-V8i.

Known Issues

Optimising Older Databases with Windows 7 and Higher

If users wish to use CloudWorx 5.1.3 for MicroStation to optimize IMP databases from Cyclone version 7.0 or higher, they must first disable User Access Control prior to optimizing, or the optimization will not succeed yet no meaningful error message will be produced.
