## What's New

### ***CloudWorx 6.3.1 for AutoCAD supports AutoCAD 2018 (AutoCAD, Civil3D, Map3D)***

### ***CloudWorx 6.3.1 for AutoCAD supports CloudWorx Ultimate***

CloudWorx Ultimate is a new license which supports the use of the following existing CloudWorx plugins:

- CloudWorx for AutoCAD Basic and Pro
- CloudWorx for MicroStation
- CloudWorx for PDMS
- CloudWorx for Revit
- CloudWorx for Navisworks
- MultiWorx for AutoCAD

### ***New CLM 1.6***

CloudWorx now includes and supports Leica Client License Manager (CLM) 1.6, which offers greater stability and a fix for EnterpriseElite customers.

## **Leica CloudWorx 6.3.1 for AutoCAD Compatibility and Upgrades**

### ***Upgrading to Leica CloudWorx 6.3.1 for AutoCAD from Leica CloudWorx 6.1.x***

You must have Administrator-level privileges on your workstation to correctly install Leica CloudWorx software.

If using IMP data, first run the current Cyclone installer if you do not have a version of Cyclone installed. Otherwise/Next run the CloudWorx 6.3.1 InstallShield and follow the directions in the InstallShield Wizard to proceed with the installation. Please heed the warning message about compatibility of earlier version databases.

All users with a currently valid CCP or with CCP which was valid as late as 15 March 2017 can receive a new license to run this version.

### ***Compatibility with Leica CloudWorx 6.3.1 for AutoCAD AND Earlier Versions***

Cyclone 7.2 databases are *NOT* backward compatible. Therefore, older databases must be updated before using Cyclone 7.2 and can no longer be used with earlier versions. If you need to work with your data in older versions of Cyclone or CloudWorx, you should make an archive copy of your database(s) prior to upgrading. Since it can take some time to update and optimise Cyclone databases, we recommend that you optimise your databases overnight, particularly when multiple databases are involved.

### ***Compatibility with Leica CloudWorx 6.3.1 for AutoCAD AND AutoCAD Versions***

CloudWorx 6.3.1 for AutoCAD officially supports Autodesk AutoCAD versions 2012-2018.

CloudWorx 6.3.1 for AutoCAD's support of RCP data is only supported in AutoCAD 2015 and later.

## **Known Issues**

### ***Optimising Older Databases with Windows 7 and Higher***

If users wish to use CloudWorx 6.3.1 for AutoCAD to optimize IMP databases from Cyclone version 7.0 or higher, they must first disable User Access Control prior to optimizing, or the optimization will not succeed yet no meaningful error message will be produced.
