

Leica Geosystems

License key activation for CS20, TS16, TS60 or MS60

Dear valued customer...

Thank you for purchasing a license for our product. The following instructions will guide you through the license activation process.

Please register your product at myWorld.leica-geosystems.com, the internet platform for our customers. myWorld provides 24/7 access to all information you require to actively manage your equipment. Detailed information on individual products and their service history can be found [here](#).

HOW TO ACTIVATE A LICENSE

The following procedure is valid for any license key loaded on a CS20 Field Controller, TS16 or TS60 Total Station or MS60 MultiStation. For the CS35 the process is different. Please read the License Activation Guide for CS35 for further information.

All licenses ordered with the instrument directly will already be activated when you receive the instrument. The license activation guide is relevant when ordering new licenses for an instrument that you already have in use. These new licenses are provided to you in myWorld. See **How to download a license key from myWorld** for further instructions.

The downloaded license key file will be called L_XXXXXXX.key, where XXXXXX is the serial number of your instrument. This file needs to be copied to the \SYSTEM folder of your SD card or USB memory device. Then insert the data storage device into your CS20 or TS/MS and turn on the instrument.

In Leica Captivate go to Settings - Tools - Load license keys and press F1(OK). The license is now activated and can be used. Go to Settings – About Leica Captivate - Leica Captivate page to see a list of all loaded licenses.

If an application license was loaded but the application is not loaded on the CS20 or TS/MS, the license will not appear in the About panel. Any Leica Captivate app not contained in the Leica Captivate firmware can be downloaded from myWorld and then installed on your instrument. See **How to download and install an application from myWorld** for further instructions.

HOW TO DOWNLOAD A LICENSE KEY FROM MYWORLD

When a new license is ordered for an instrument that you already have in use, the license can be downloaded from myWorld. Follow the steps below to download the newly purchased license.

- Go to www.myworld.leica-geosystems.com and log in.
- Go to myProducts and select your product. (If your product is not in the list, click “Add Product”.)
- On the Overview tab, click “Download keys”.
- In the next window, click Save and select a directory to save the file to.

HOW TO DOWNLOAD AND INSTALL AN APPLICATION FROM MYWORLD

When reordering an app that is not included in the Leica Captivate firmware file for an instrument that you already have in use, the app can be downloaded from myWorld for installation on your instrument. Follow the instructions below to download and install a new app.

- Go to www.myworld.leica-geosystems.com and log in.
- Go to myProducts and select your product. (If your product is not in the list, click “Add Product”.)
- Click the Software tab and scroll down to “Local apps”.
- Download the apps to your computer. The file will be of type .axx for CS20 and TS/MS and .dxx for CS35
- Store the app file in the \SYSTEM directory of the data storage device.

- Insert the data storage device into your CS20 or TS/MS and turn on the device.
- Go to Settings – Tools – Update software
- Select the app to install in the “File to load” list box.
- Click F1(OK). The application software is installed on your product.
